

SCAFFOLD & ACCESS SOLUTIONS

Scaffolding Extension Cords

Y-Splitter Cords

W-Splitter Cords

Scaffolding Yokes

Transformers

ESL offers watertight “Y” and “W” cable splitters used in a variety of industrial and commercial applications. These products include molded neoprene yokes, booster transformers and step down transformers for the temporary distribution of electricity at the job-site, on suspended scaffolds and for the theatrical and special event industries.

Y-Splitter Cords

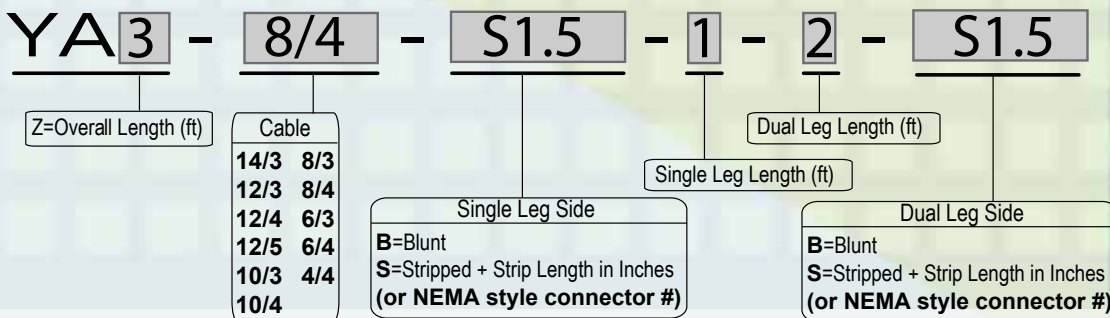

Y-Splitters divide power from one source into two branches for the temporary distribution of electricity.

Standard and Optional Features

- Molded “Y” neoprene cord assembly with 600V SOOW cable
- Available in various gauge sizes and lengths
- Heavy duty watertight design for industrial environment
- Optional NEMA style or IEC Pin & Sleeve connectors available

Y-Splitter Product Selection Guide

W-Splitter Cords

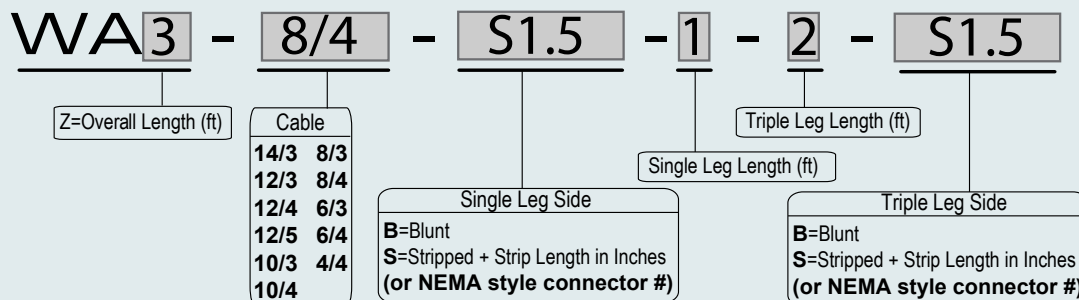

W-Splitters divide power from one source into three branches for the temporary distribution of electricity.

Standard and Optional Features

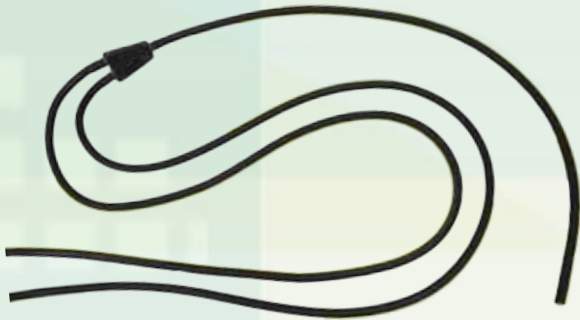

- Molded neoprene “W” cord assembly with 600V SOOW cable
- Available in various gauge sizes and lengths
- Heavy duty watertight design for industrial environment
- Optional NEMA style or IEC Pin & Sleeve connectors available

W-Splitter Product Selection Guide

Scaffolding Yokes

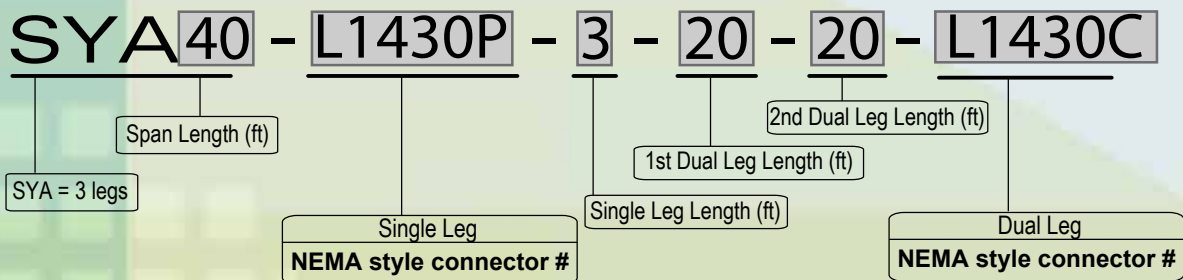

Yokes divide power from one source into two extended length branches. Perfect for sharing power over long distances and allows for greater mobility when working.

Standard and Optional Features

- Molded neoprene Yoke cord assembly with 600V SOOW cable
- Available in various gauge sizes and lengths
- Heavy duty watertight design for industrial environment
- Optional NEMA style or IEC Pin Sleeve connectors available
- Available in three standard styles: blunt, 20 amp, and 30 amp

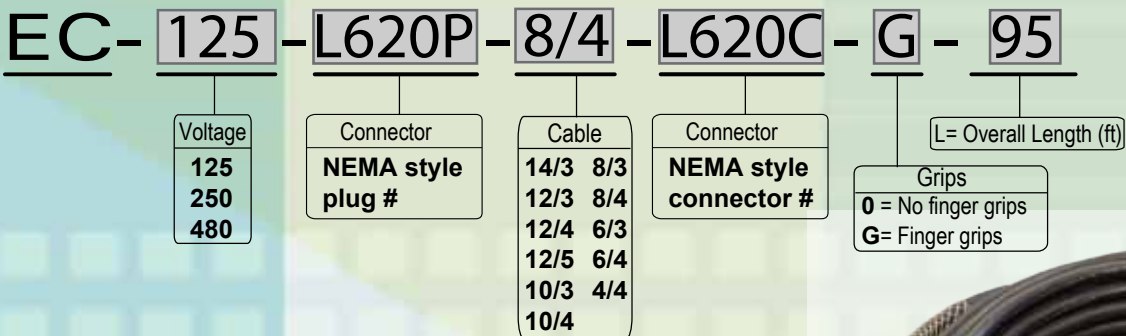

Scaffolding Yoke Product Selection Guide

Scaffolding Extension Cords

Available in various lengths with 20A or 30A connectors. Optional finger grips also available to help support the cable and prevent stress on the wiring devices and the possible pull-out of the conductors from the wiring devices.

Scaffolding Extension Cord Product Selection Guide

Transformers

In addition to Molded Products, ESL also offers portable transformers.

Booster Transformers

Necessary when the voltage supplied at the source is too low or the distance from the power source is so great that drops in voltage occur.

Step-down Transformers

Safely step 230VAC down to 115VAC for use with equipment requiring 115VAC.

Step-down Transformers enable operators to decrease the electrical voltage (VAC) to match the load requirements.

Transformer Product Selection Guide

XK	3	-	208	-	L620P	-	10	-	2.5	-	250	-	L620R
	KVA		Voltage (Primary)		Connector		Cable Length (Primary)		Cable Length (Secondary)		Voltage (Secondary)		Connector
	1.5 3		125 208 250 480		NEMA style plug # B = Blunt		1 2 2.5 10		1 2 2.5 10		125 208 250 480		NEMA style connector # B = Blunt

About ESL

Since its inception in 1991, ESL Power Systems, Inc. has emerged as one of the largest manufacturers of products and solutions for power cord-connected equipment.

ESL offers splitters, yoke assemblies, extension cords and transformers for the scaffolding and entertainment industry. We are also known as the best-in-class builders of Reefer Outlet Assemblies, Ship-to-Shore Power Mounds, Company Switches for Set Stage applications and Manual Transfer Switches for transferring back-up power during grid outage. In addition, ESL Power Systems is known as the premier Custom Control Panel Builder in Southern California!

As a certified small business, ESL is proud to provide solutions with the lowest cost of ownership in the industry. ESL demonstrates its continuous commitment to customers by delivering sound workmanship on time and within budget.

Industries

- Scaffolding/Swingstage
- Intermodal
- Entertainment
- Water/Wastewater
- OEM/Contract Manufacturing
- Emergency Power Connection Equipment
- Alternative Energy
- Shore Power
- Pharmaceutical/Biotech
- Petrochemical
- Industrial & Shipyard
- Wayside Power
