- ESL team members maintain an average of 8 years of dedicated service
- Serving a wide variety of industries
- SBE Certified

“The ESL team – promising quality, innovative solutions and integrity in everything we do.”
- David Hellmers, Vice President
ESL reaches beyond the traditional role of panel builder to become a reliable manufacturing partner for a wide variety of local and nationwide clients and their unique designs. With a large reconfigurable facility, quality workmanship and pride go into every ESL product.
Building or upgrading production facilities requires control systems and electrical products that are durable, reliable, and delivered on time. ESL teams with other manufacturers, engineering firms and integrators to construct cost effective, reliable panels and equipment.
ESL believes the best results are achieved through teamwork - the client, ESL and a network of key vendors. ESL’s approach is to develop competitive solutions tailored to client requirements.
ESL SAVES CLIENTS TIME & MONEY

- Quotations are precise and alternatives are offered to reduce costs and lead times whenever possible
- In-house AutoCAD provides quick turn-around on panel layout drawings and wiring schematics
- Volume purchasing of industrial control components helps minimize material costs
- Independent internal QC department inspects all products to ensure customer expectations are always met
- Experienced personnel to assist in FATs to help solve problems before field installation
- Company trucks make local deliveries promptly
- In-house FAB shop provides customers with greater flexibility for customized fabrication

METICULOUS QUALITY CONTROL MEANS TOTAL CUSTOMER SATISFACTION!
“Our most valuable asset is our Team”
- Carol Crawford, Founder

Builders of Custom Control Panels and Electrical Equipment since 1973
